What is the Environmental Collection Center?
- A drive-through, drop-off site for environmentally-safe and easy disposal of household hazardous waste.

Why use the ECC?
- Dumping household chemical waste into storm drains is illegal. Since stormwater enters streams, rivers, and lakes without any treatment, this may result in water pollution. This waste should not be disposed of in your home trash/recycling.

Who can use the ECC?
- Residents of Fort Worth and participating cities
- Proof of residency is required (driver's license OR current water bill)
- Residents of participating cities may need a voucher. Check with your local government or www.fortworthtexas.gov/env for voucher requirements.
- No commercial/industrial waste can be accepted.

Crud Cruiser Mobile Collection Events
Convenient neighborhood collection of household hazardous waste. Check the Crud Cruiser schedule at www.FortWorthTexas.gov/env/ecc or 817-392-6268.

Transporting Your Waste
Keep chemicals in original, labeled containers. Place items in boxes or bins (no trash bags please) and secure in trunk or truck bed.
